**Service before Confederation to be counted.**   **7.** Service in an established capacity in any of the departments of the executive government or offices of the legislature of any of the provinces, now included in the Dominion of Canada, before such province became a portion thereof, by any person who thereafter entered the Civil Service, shall be reckoned in computing his period of service for the purposes of this Act. R.S., c. 18, s. 13.

**Breaks in service not to be counted.**   **8.** If the service has not been continuous, the period or periods during which such service has been interrupted shall not be counted. R.S., c. 18, s. 3.

**Preliminary inquiry by Treasury Board.**   **9.** The superannuation of every civil servant shall be preceded by an inquiry by the Treasury Board,—  
(a) whether the person it is proposed to superannuate is eligible within the meaning of this Act; and,

## SESSIONAL PAPER No. 30

(b) whether the superannuation of such person will result in benefit to the service, and is therefore in the public interest; or,

(c) whether superannuation has become necessary in consequence of the mental or physical infirmity of such person. R.S., c. 18, s. 5.

**10.** No civil servant shall be superannuated unless the Treasury Board reports that he is eligible within the meaning of this Act and that such superannuation will be in the public interest. R.S., c. 18, s. 5. Report of Board.

## ALLOWANCES AND GRATUITIES.

**11.** The superannuation allowance hereinbefore mentioned shall be calculated upon the average yearly salary, during the last three years of service, of the person to whom such allowance is to be made, and shall not exceed, if such person has served for ten years, but less than eleven years, an annual allowance of ten-fiftieths of such average salary, and, if he has served for eleven years but less than twelve years, an annual allowance of eleven-fiftieths thereof, and in like manner a further addition of one-fiftieth of such average salary for each additional year of service up to thirty-five years, when an annual allowance of thirty-five-fiftieths may be granted, but no addition shall be made for any service beyond thirty-five years. Rates of allowances.

2. In computing the number of years of service for the purposes of this section, if the actual period of service includes a fraction of a year, the fraction, if equal to or greater than one-half, shall be counted as a full year's service. R.S., c. 18, s. 3; 3 E. VII., c. 10, s. 1. Fraction of one-half or more equal to one year.

**12.** The Governor in Council may, in the case of any person who entered the Civil Service after the age of thirty years, as being possessed of some peculiar professional or other qualifications or attainments required for the office to which he was appointed, and not ordinarily to be acquired in the public service, add to the actual number of years of service of such person, such further number of years not exceeding ten, as is considered equitable, for reasons stated in the order in council made in the case, and such additional number of years shall be taken as part of the term of service on which the superannuation allowance of such person shall be computed. R.S., c. 18, s. 4. Ten years may be added.

**13.** If the head of a department reports with respect to any person employed in his department, and about to be superannuated, from any cause other than that of ill-health or age, that the service of such person has not been satisfactory, the Governor in Council may, as to him seems fit, grant such person a superannuation allowance less than that to which he would have otherwise been entitled. R.S., c. 18, s. 9. Diminished allowance if service unsatisfactory.

Gratuity when yearly allowance not earned.

**14.** If any person to whom this Act applies is constrained, from any infirmity of mind or body, to quit the Civil Service before the period at which a superannuation allowance might be granted him, the Governor in Council may allow him a gratuity not exceeding one month's pay for each year of his service; and if any such person is so constrained to quit the service before such period, by reason of severe bodily injury, received without his own fault, in the discharge of his public duty, the Governor in Council may allow him a gratuity not exceeding three months' pay for every two years' service, or a superannuation allowance not exceeding one-fifth of his average salary during the then last three years. R.S., c. 18, s. 10.

Compensation if retirement compulsory.

**15.** If any person to whom this Act applies is removed from office in consequence of the abolition of his office for the purpose of improving the organization of the department to which he belongs, or is removed or retired from office to promote efficiency or economy in the Civil Service, the Governor in Council may grant him such gratuity or superannuation allowance as will fairly compensate him for his loss of office, not exceeding such as he would have been entitled to if he had retired in consequence of permanent infirmity of body or mind, after adding ten years to his actual term of service. R.S., c. 18, s. 11.

Limited.

Payment of allowances.

**16.** The allowances and gratuities granted under this Act shall, as to all persons appointed to the Civil Service previous to the first day of April, one thousand eight hundred and ninety-three, be payable out of the Consolidated Revenue Fund of Canada, and as to all persons appointed to the Civil Service on or after the last mentioned date, the same shall be payable out of the Civil Service Superannuation Fund, number two, hereinafter defined. R.S., c. 18, s. 15; 56 V., c. 12, s. 4.

per centum per annum thereon if it is less than six hundred dollars, and such deduction shall be carried to the credit of a fund called the Civil Service Superannuation Fund, number two, to which shall be added by the Government annually such a sum as, upon an estimate or valuation thereof based upon the H. M. Mortality Table of the Institute of Actuaries of Great Britain and a rate of interest of six per centum per annum, may be sufficient to make the amount thereof equal to the value of the prospective annuities payable therefrom. 56 V., c. 12, s. 3.

**19.** The deductions mentioned in the last two preceding sections shall be made only during the first thirty-five years of service. R.S., c. 18, s. 6. Deductions during 35 years of service only.

#### COMPULSORY RETIREMENT.

**20.** Retirement shall be compulsory on every person to whom the superannuation allowance hereinbefore mentioned is offered, and such offer shall not be considered as implying any censure upon the person to whom it is made; nor shall any person be considered as having any absolute right to such allowance, but it shall be granted only in consideration of good and faithful service during the time upon which it is calculated. R.S., c. 18, s. 8. When.  
No absolute right to allowance.

**21.** Nothing herein contained shall be understood as impairing or affecting the right of the Governor in Council to dismiss or remove any person from the Civil Service. R.S., c. 18, s. 8. Right of dismissal unimpaired.

#### DISMISSAL.

**22.** The Governor in Council may, on the recommendation of the Treasury Board, pay to any person heretofore or hereafter dismissed from the public service of Canada, who at the time of such dismissal was contributing to any civil service superannuation fund under the provisions of this Act, or who has contributed to any such fund or funds during thirty-five years of service, the whole, or such portion as the Governor in Council deems expedient of the amount so contributed by such person to such fund. Deductions may be repaid.

2. The Governor in Council may also, on the recommendation of the Treasury Board, in addition, pay to such person interest to the date of such dismissal on the contributions so repaid, or any portion thereof, at such rate of interest not exceeding five per centum per annum, and calculated in such manner, as the Governor in Council deems advisable. 60-61 V., c. 15, SS. 1 and 2. With interest.

In discretion  
of Governor  
in Council.

**23.** Nothing in the last preceding section contained shall be construed to confer upon any person any right to demand or enforce the repayment of any amount contributed by him to any such fund, or any interest thereon, and all payments made under the last preceding section shall be wholly in the discretion of the Governor in Council. 60-61 V., c. 15, s. 3.

#### FORFEITURE OF ALLOWANCE.

In what  
cases.

**24.** Every person who receives a superannuation allowance, and is under the age of sixty years, and is not disabled by bodily or mental infirmity, may be called upon to fill, in any part of Canada, any public office or situation for which his previous services render him eligible, and which is not lower in rank or emolument than that from which he retired; and, if he refuses or neglects so to do, he shall forfeit his said allowance. R.S., c. 18, s. 12.

## REPORT OF THE COMMISSIONERS.

The Civil Service Commission has completed the fifth year of its existence and submits the fifth annual report of its proceedings. As usual, the report covers the proceedings of the Commission for the year ending August 31. The main body of the report contains the general Civil Service Act and the various amending Acts which have been passed from 1908, also the Regulations of the Civil Service Commission, as approved by the Governor General in Council. The concrete results of the proceedings of the Commission for the past year are furnished in tabular form and afford full information as to the general and special examinations, the special competitions and individual nominations, the non-competitive, qualifying and promotion examinations, etc., for both the Inside and Outside Service.

The first table, pp. 75-78, gives a summary of the written examinations held during the year. The large number of Special Lower Grade Examinations, appearing in the table, is due to the fact that the ministers and their deputies enjoy the option, which is almost invariably exercised, of nominating individual candidates for the positions of messengers, sorters and packers, instead of permitting them to be selected from the list of successful candidates at the regular Lower Grade Examination. As these nominations occur at irregular intervals, the frequency of the tests to insure at least the minimum qualifications of such candidates will account for their exceptional prominence in the list. The number of appointments made from the regular competitive list, either by nomination or selection, is given in table No. 8 (A), p. 101, and amounts to twenty, while the appointments made by special nomination beyond that list are given in table No. 8 (B), pp. 102-103, and amount to eighty-seven.

The second table, pp. 79-80, gives the number of centres throughout the Dominion where the regular semi-annual examinations were held during the year; also the number of candidates, distinguishing men and women, who wrote at each place. The list of centres where provision has been made for holding examinations, the institutions which provide accommodation for the holding of the examinations, and the names of the persons who act as presiding examiners at the various places, are given in table No. 6, p. 97. The very limited number of candidates for positions in the Inside Service writing at centres beyond Ottawa, as compared with the larger numbers writing on the Outside Service Examinations, is chiefly to be accounted for by the fact that the salaries offered for similar grades of qualification are greatly in favour of those in the Outside Service. Further, candidates for the Outside Service are likely to obtain employment in the neighbourhood of their homes, while those taking the examinations for the Inside Service, in addition to accepting the lower salaries provided by law, are required to leave their home centres, involving the expense of moving to Ottawa, and must support themselves under the more expensive conditions of the Capital.

The names of the successful candidates at the various examinations, and the centres at which they wrote, are given in table 3, pp. 81-94. In connection with this list it is to be observed that those passing the Preliminary and Qualifying Examinations for the Outside Service are merely eligible for appointment, but are in no way guaranteed appointments. The Commission is quite unable to say how many of these successful candidates have the additional qualifications which will enable them to secure appointments, or how those securing the appointments stood on the examination lists. On the other hand, the successful candidates for the Third and Second Divisions, being confined in numbers to the vacancies advertised, and being selected in the order of their standing on the examinations, are all guaranteed appointments on probation, and all but a very small fraction proving acceptable, they pass automatically into the permanent service. The successful candidates at the regular examinations for lower grade appointments as messengers, sorters and packers for the Inside Service, do not come under the same conditions as the candidates for the Third and Second Division clerkships. As in the Outside Service, they are merely qualified for appointment, but not guaranteed appointment. As, in practice, very few of those who were successful at the Lower Grade Examinations were permitted to secure appointments, the semi-annual examination for that grade in November has been discontinued, and only an annual examination in May of each year retained.

The list of examiners who set the papers and valued the answers for the various grades of examinations is given in table 4, pp. 94-96. In the case of the examinations for the Second Division, the papers being set and the answers valued by two independent examiners, appeals are unnecessary. In the case of the Preliminary, Qualifying, Third Division and Lower Grade Examinations, however, the papers being examined by one examiner only, an appeal is provided for, and the list of examiners for the few cases appealed is given in table 5, pp. 96-97.

In table No. 7, pp. 98-100, is given a list of special competitions for various technical and other appointments requiring a combination of qualifications, theoretical and practical, few of which can be adequately tested by written examinations. The tests applied and the methods of selection necessarily vary with the requirements of the positions to be filled. The results in these cases have proved even more satisfactory than from the regular semi-annual examinations, where it is impossible, and, fortunately, not often necessary, to take into account the practical experience of the candidates as well as their general education. The table indicates the nature of the positions to be filled, the departments in which they exist, the number of vacancies to be filled, the number of candidates applying in each case, and the names of the successful candidates for the various positions. In a number of cases, before the selection was completed and the appointment made, those selected as successful candidates had secured more remunerative positions elsewhere, and therefore declined the appointment in the Service. Those lost to the Service in this way are also indicated in the table.

## SESSIONAL PAPER No. 31

In table No. 9, pp. 104-107, will be found the positions in the Service to which the various successful candidates at the Third Division Examinations were appointed by the Commission, as also the salaries at which they entered upon their permanent appointments by agreement between the departments and the Commission. Where the salary is above \$500, the person receiving the extra amount had proved to be possessed of special qualifications and the payment of the extra salary had been approved by the Treasury Board and sanctioned by Order in Council. While the initial salaries provided for indicate fairly well the relative qualifications and experience of the candidates at the time of permanent appointment, yet it must be admitted that in a number of cases clerks enter at the minimum salary who are quite as much entitled to the higher salaries as those who receive them. In these few cases, however, either at the time of appointment no higher salary was available, or in the department in which the appointment took place and in which the candidate was previously employed in a temporary capacity, no provision had been made for more than the minimum salary.

Table 10, pp. 108-109, gives particulars with reference to permanent appointments in the Second Division similar to those in the previous table with reference to the Third Division.

Tables 11, pp. 110-111, and 12, pp. 112-114, indicate the practical working of the present system of appointments to special positions where, in the majority of cases, the Executive Government has the option of allowing the positions to be filled by open competition or of requiring them to be filled by special nomination on the part of the heads of the departments. Thus, in table 11, is given a list of the persons appointed by the Civil Service Commission as the result of open competitions. The special positions are described, the departments under which they come and the initial salaries provided in the various cases. In table 12 (A) are given the names of the persons appointed to special positions as the result of their selection by open competition, but whom the Commission alone could not appoint by reason of their being somewhat over the age limit of thirty-five, or, in a few cases, lacking three years' residence in the country, and thus requiring to be appointed by Order in Council under section 21 of the Civil Service Amendment Act. In table 12 (B) will be found the names of those who were not selected by open competition, but were nominated by the Heads of the departments and appointed under section 21 of the Civil Service Amendment Act after the Commission had satisfied itself that the candidates had at least the minimum qualifications for the positions in question. In connection with this list of appointments more than any other, the role of the Commission is quite varied. In a number of cases the Commission informally assisted in the selection of the candidates and was quite satisfied as to their special qualifications. In some cases it was evident that the parties nominated were better qualified for the duties to be performed than any who were likely to apply under an open competition. In other cases, however, it appeared to the Commission that considerably better qualified persons than those nominated might have been obtained for the positions in question had they

been permitted to apply and have their qualifications tested. The Commission, however, being limited in its report to the qualifications of the parties nominated in each case, had simply to consider whether the nominee had at least the minimum qualification for the discharge of the duties of the position to be filled. If so, the certificate could not be withheld, but if not, the certificate should be withheld. On this ultimate ground some of the nominees received certificates and some did not. Under this table, therefore, the certificates issued by the Commission represent qualifications which, in its estimation, range from the best available to the minimum tolerable.

Tables 13, pp. 115-117, and 15, pp. 120-131, give the lists of those appointed to temporary positions chiefly in the Lower Grade and Third Division. Table 14, pp. 118-119, simply includes those successful candidates for the Third or Second Division, who were employed in a temporary capacity pending their permanent appointment. The temporary appointments in tables 13 and 15 have given rise to much difficulty for the Commission, and are the causes of considerable waste of time and energy, and the occasion of much inconvenience and inefficiency in the Service. Moreover, the political pressure enlisted to secure temporary employment is a source of constant annoyance to members and ministers and ultimately to the Commission. The difficulty of securing the required number of adequately qualified clerks for permanent appointments to the Third and Second Divisions is one root of the evil. This difficulty, which is due to the inadequacy of the initial salaries offered, has embarrassed the work of the Commission from the beginning. The difficulty has steadily increased with the increasing cost of living in Ottawa. It is true that, in a number of cases, as already indicated, especially in the Third Division, advantage has been taken, by some departments, of clause 33 in the Civil Service Act of 1908, which permits of an increase in the minimum salary on appointment. In other cases, particularly in the Third Division also, clerks are recommended for promotion within a year or two after their appointment. These methods of meeting the difficulty apply only to individual cases and after the examinations have been passed. The Commission is not authorized to offer any of these inducements in their advertisements of the vacancies to be filled. Thus the knowledge of the extra remuneration which may be available in special cases is confined to those who reside in Ottawa and who are in immediate touch with the operations of the departments. The result of this has been that the number of candidates from outside centres has been very disappointing. At the same time, there has been a very satisfactory response from the country at large to the advertisements of the Commission in the case of positions offering reasonably adequate salaries.

Referring to the actual results for the past year, we find that at the semi-annual examinations for November, 1912, and May, 1913, vacancies were advertised for two hundred and sixty-five (265) clerks in the Third Division; for these positions there were four hundred and ninety-six (496) candidates, of whom one hundred and thirty-five (135) were men and three hundred and sixty-one (361) women. Of these candidates, however, four hundred and thirty-two (432) were from Ottawa and only sixty-four (64) from the other parts of the Dominion. The experience of the past five years amply demonstrates that while

## SESSIONAL PAPER No. 31

the minimum salary hitherto offered has attracted more than a sufficient number of successful candidates for positions to be filled by women, the remuneration offered has steadily failed to attract the requisite number of young men. Thus during the past year 145 positions in the Third Division were advertised for young men. For these, however, only 121 candidates applied and only 49 were successful. As usual, the discrepancy is particularly noticeable in the case of male stenographers. For this grade of work 30 vacancies were advertised, but only 14 young men took the test, and of these 9 were successful. The result in all such cases has been that, in order to fill the positions in question, women had to be selected instead of men, although in many cases the circumstances attending the duties were not at all suitable for women.

Out of this very unsatisfactory situation arises another and even more troublesome situation. Partly because of the inadequate number of duly qualified male clerks who are available for permanent appointment at the minimum salary offered; partly because inadequate provision is made in the estimates of several large departments for the appointment of permanent clerks in the Third Division; and partly because of the opportunities afforded for the exercise of a considerable amount of political and personal patronage, much of the regular and permanent work of the Third Division in certain departments is being performed by temporary clerks. The legal limit of employment for temporary clerks being six months in any fiscal year, new clerks are being constantly taken on to replace those whose time has expired. Where the temporary employment covers the close of one fiscal year and the beginning of the next, the term of temporary service may extend from six to twelve months without interruption. Even under these conditions, however, new temporary clerks are frequently being taken on. Much of the work being of a permanent character, the employment of temporary, and commonly only very partially qualified clerks, results in much waste of time and energy on the part of the older and higher grade clerks in periodically instructing the new comers in the duties to be performed. For a corresponding time also, the services rendered by the new temporary clerks are inadequate in both volume and quality. Obviously, a smaller number of duly qualified permanent clerks would be able to render the necessary service. They might also be paid considerably better salaries without the total cost to the Government being at all increased.

Growing out of the practice of employing temporary clerks to perform permanent service, certain other difficulties have gradually arisen, greatly increasing the difficult and unpopular duties of the Commission in guarding against the evasion of the Civil Service Acts. Although temporary clerks can not be employed longer than six months in any fiscal year, no corresponding provision applies to temporary messengers, sorters and packers. Moreover, there is nothing in the law to prevent the employment of a person one half of the year as a temporary clerk and the remaining half of the year as a temporary sorter, and at present the salary of a temporary sorter is the same as that of a temporary clerk, namely \$500. Obviously, therefore, where a temporary clerk has the requisite influence to secure his nomination as a sorter after completing the full term allowed as a temporary clerk, he may be continued in the employ-

ment as a sorter. So long as the work is changed from that of a clerk to that of a sorter, no legal objection can be taken to this method of securing indefinite employment. But once a person appointed as a temporary clerk has become acquainted with the clerical work of a department, when he passes from the grade of temporary clerk to that of temporary sorter there is naturally a very great and obvious temptation to continue the employee at the same work which he or she was performing as a temporary clerk. This practice, however, is plainly an evasion of the law and if permitted to pass unchecked, the legal restriction of temporary employment in a clerical capacity to six months in any fiscal year becomes a dead letter. Further, the qualifications required for clerical appointments of a permanent nature become wholly unnecessary. Any of the clerical positions in the Third Division might be filled by those who have no qualifications other than the minimum standard of the very elementary test for the Lower Grade appointments to the mechanical work of sorting and packing. As practically all of these Lower Grade appointments are now made through political patronage, the apparent provision under the Civil Service Act for a non-partisan and efficient clerical staff in the Third Division is in danger of becoming a mere blind.

To prevent as far as possible the present trend in this direction has involved frequent investigation on the part of the Commission, resulting in the withholding of certificates for the reappointment of a number of temporary clerks as sorters and packers. So difficult, however, is it to determine in advance of the granting of certificates for Lower Grade appointments whether those to be appointed are to be employed at really Lower Grade work, or at a continuance of their previous clerical work, that it is almost impossible to prevent evasions of the law. So long also as no adequate provision is made for a sufficient number of permanent clerkships and for the supply of the necessary number of duly qualified and adequately remunerated clerks, the recently developed practice must impair the efficiency of the Service, promote extravagance and occasion friction between the Commission and some of the departments.

Some concrete evidence will illustrate the situation. The number of temporary clerks appointed to the Third Division during the past year amounted to four hundred and eighty (480), of whom two hundred and eleven (211) were re-employed for the second time, and only eighty-eight (88) of the total number qualified for permanent appointments. During the same period only one hundred and eighty-six (186) Third Division clerks were appointed for permanent service. At the same time, the majority of the four hundred and eighty temporary clerks were employed at work of a permanent character and for which permanent clerks ought to have been appointed. During the same period, one hundred and twenty-four (124) were employed in a temporary capacity in the Lower Grade, while one hundred and seven (107) were appointed in a permanent capacity; of these only twenty (20) were taken from the list of successful candidates at the regular examination for Lower Grade positions, all of the others were nominated by the departments, most of the names being sent in by the political organizers of the city of Ottawa.

## SESSIONAL PAPER No. 31

It is gratifying to know that in some departments there is a likelihood of steps being taken during the approaching session to partially remedy this situation by making provision for the conversion of a considerable number of temporary employments into permanent positions in the Civil Service.

The names of the persons, for whose promotion in the Inside Service certificates were issued during the past year, are given in table 17, pp. 134-139. An analysis of this table shows that during the year:—

Thirty-one persons were promoted from subdivision B to subdivision A of the First Division.

Sixty-one were promoted from subdivision A of the Second to subdivision B of the First Division.

Ninety-nine were promoted from subdivision B to subdivision A of the Second Division.

Nineteen were promoted from subdivision A of the Third Division to subdivision B of the Second Division after passing the non-competitive Promotion Examination provided for in this case, while one hundred and thirty-eight were promoted from subdivision B to subdivision A of the Third Division.

Certificates of qualification for promotion were withheld in the case of forty persons nominated.

It is understood that a bill will be introduced during the coming session to consolidate and amend the Civil Service law. This is relied upon to correct a number of anomalies and difficulties which the changing conditions of the country and the rapid development of the Civil Service have rendered increasingly embarrassing under existing and prospective conditions.

The Commissioners are particularly pleased to recognize the good offices of the staff of the Commission. By their capacity, devotion and efficiency, their work has been very satisfactory.

## 2. THE REGULATIONS OF THE CIVIL SERVICE COMMISSION.

### EXAMINATIONS FOR ENTRANCE TO THE INSIDE SERVICE.

1. In order to comply with section 13 of the Civil Service Amendment Act, which states that 'except as herein otherwise provided, appointment to positions in the Inside Service under that of deputy head shall be by competitive examination, which shall be of such a nature as will determine the qualifications of candidates for the particular positions to which they are to be appointed, and shall be held by the Commission from time to time in accordance with the regulations made by it and approved by the Governor in Council,' the Commission will provide for general competitive examinations for entrance to the following divisions and subdivisions of the Inside Service:—

- (a) Clerks for Subdivision B of the Third Division.
- (b) Clerks for Subdivision B of the Second Division.

2. In accordance with section 15 of the Civil Service Amendment Act, the number of competitors to be selected, for appointment to the Service, from those taking the examinations for the above divisions, shall be computed by the Commission on the basis of the reports from the several departments as to their probable requirements for the ensuing six months.

3. The general competitive examinations shall be held twice a year, in the months of May and November. Forms on which applications for these examinations shall be made will be provided by the Commission, and may be had on application to the Secretary of the Commission. Where not less than three candidates make application to take an examination at the same place, general competitive examinations shall be held at the following places: Sydney, Halifax, Yarmouth, Charlottetown, St. John, Fredericton, Moncton, Quebec, Sherbrooke, Montreal, Ottawa, Kingston, Hamilton, Toronto, London, Sault Ste. Marie, Port Arthur, Winnipeg, Brandon, Regina, Saskatoon, Calgary, Edmonton, Nelson, Vancouver and Victoria. Examinations may also be held at such other places as may be selected by the Commission for the convenience of candidates applying for examination.

(2) Where competitive examinations are required involving technical or scientific subjects and necessitating the use of the scientific apparatus, it shall not be necessary to hold such examinations at each of the above places, but the Commission shall, as far as possible, arrange for at least one place in each province where such examinations may be taken.

4. Any examination may be taken in the English or French language, at the option of the candidate.

5. A general examination for messengers, porters, sorters and packers shall be held annually in the month of May, at the same places as the general examinations for the Third and Second Divisions, and shall include the following subjects of the ordinary public school standard: Writing, spelling and the first four rules of arithmetic. The minimum percentage of qualification shall be fifty per cent on each subject and sixty per cent on the whole examination.

6. Where messengers, porters, sorters and packers require certificates of qualification and fitness under section 22 of the Civil Service Amendment Act, the Commission may require any or all of these to pass an examination which shall be as nearly as may be of the same standard as that set for those who take the general examination for entering that grade of the Service.

7. The general competitive examination for clerkships of Subdivision B of the Third Division shall include the following subjects: Writing and

copying manuscripts, spelling, composition, arithmetic, geography, history, type-writing. The maximum number of marks for each subject shall be one hundred, except in the subjects of writing and copying manuscripts, for each of which the maximum number shall be fifty marks. No candidate shall be selected for appointment to a position in the Third Division who secures less than fifty per cent of the marks assigned to the subjects of spelling, composition and arithmetic and sixty per cent of the marks assigned to the whole examination. The standard of examination shall require a good general knowledge of the above subjects.

8. Candidates may take, in addition to the foregoing subjects, either or both of the subjects of stenography and book-keeping. Where candidates obtain over sixty per cent of the marks assigned to either or both of these subjects, the marks above sixty per cent may be added to the total of the marks obtained on the compulsory subjects in determining the relative standing of the candidates in the general examination.

9. Persons employed in the Civil Service, in the Third Division, may take the competitive examination for entrance to the Second Division under the following regulations:—

(1) Such persons must have passed the Third Division Examination at least one year before competing in such examination; also their records in the reports to be furnished under the Civil Service Amendment Act must be good.

(2) In cases of failure in such examination any person so failing shall not compete again within a year.

(3) Persons so failing may, if their records for conduct continue good, present themselves for examination a third time, but in case of failing a third time they shall not again be allowed to take the said examination.

10. To insure the availability of a sufficient number of competent typewriters and stenographers, the Commission may appoint a special competitive examination for typewriters and stenographers, for Subdivision B of the Third Division, which shall include the following subjects:—Typewriting, stenography, writing and copying manuscripts, spelling and composition. Successful candidates must obtain at least fifty per cent of the marks assigned to each subject and sixty per cent of the marks assigned to the whole examination.

(2) Where a sufficient number of typewriters and stenographers are not available among those who have taken the full examination for Subdivision B of the Third Division, the requirements of the departments may be supplied by appointing, in order of merit, those who have taken the special examination for typewriters and stenographers.

(3) No one appointed as the result of such special examination shall be considered as eligible for promotion to Subdivision A of the Third Division who has not subsequently qualified in the additional subjects of arithmetic, history and geography, as required for the regular examination for entrance to the Third Division.

11. Where candidates for employment as temporary clerks require certificates of qualification and fitness under section 23 of the Civil Service Amendment Act, the Commission may require any or all of these to pass an examination which shall be as nearly as may be of the same standard as that set for those who take the general examination for entering that grade of the service.

12. Candidates for the general competitive examination for clerkships of Subdivision B of the Second Division shall take all the subjects in group A of the following list, and any five in group B:—

Group A.—Writing, Spelling, Composition, Literature, Arithmetic.

Group B.—Algebra, Geometry, Physics, Chemistry, Geology (including mineralogy), Biology (animal and vegetable), French (for those taking the

## SESSIONAL PAPER No. 31

general examination in English), English (for those taking the general examination in French), Latin, German, History (modern), Political Science, Economics, Geography (general, physical and commercial), Philosophy (scholastic or general), Law (English or civil).

(2) The maximum number of marks for each subject shall be one hundred, except in the subject of writing, for which the maximum number shall be fifty marks.

(3) No candidate shall be selected for appointment to a position in Subdivision B of the Second Division who secures less than forty per cent of the marks assigned to each subject in group A, and sixty per cent of the marks assigned to the whole group.

(4) No candidate shall be selected for appointment to a position in Subdivision B of the second Division who secures less than thirty per cent of the marks assigned to each subject in group B, and forty per cent of the marks assigned to the five subjects selected.

(5) The standard of examination shall require a good general knowledge of the subjects selected from the above groups. In order that due regard may be had to the different educational systems in Canada, a curriculum shall be prepared by the Commission showing, with as much detail as possible, the ground to be covered under each of the subjects in the above groups A and B. A copy of this curriculum shall be supplied to any person on making application to the Secretary of the Commission.

13. Candidates may take, in addition to the foregoing subjects any or all of the subjects of typewriting, stenography, and book-keeping. Where candidates obtain over sixty per cent of the marks assigned to any one or more of these subjects, the marks above sixty per cent may be added to the total of the marks obtained on the whole examination in determining the relative standing of the candidates.

14. Where the deputy head of a department applies to the Commission for a nomination to a clerkship in Subdivision B of the Third Division requiring special qualifications not covered by the general examination for that division, or for a nomination to a clerkship in Subdivision B of the Second Division requiring special qualifications in technical or scientific subjects, a special competitive examination may be provided by the Commission, instead of the general competitive examinations for either of these subdivisions. The subjects for such special examination shall be arranged between the Commission and the deputy head of such department.

15. Where the deputy head of a department applies to the Commission for a nomination to a position above that of Subdivision B of the Second Division, which requires to be filled by appointment from without the Service, the Commission shall, after consulting with the deputy head of the department in which the appointment is to be made, provide a special competitive examination or test, which may or may not involve written answers to questions, but which shall be of such a nature as to secure a person well qualified for the position to be so filled. In determining the qualifications of candidates for such positions, the examination or test shall have special reference to executive ability and tact, such special or professional training as may be required, and a successful experience in duties similar to those pertaining to the positions to be filled.

16. Where the appointment is one which is to be made under section 21 of the Civil Service Amendment Act inasmuch as the person to be appointed requires to obtain from the Commission a certificate that he possesses the requisite knowledge and ability, the Commission, with the consent and co-operation of the head and deputy head of the department in which the appointment is to be made, may arrange a form of examination or test, by which to determine whether the person is qualified. On satisfying the Commission that he is duly qualified, such person will receive the certificate of the Commission.

17. When the selection is made by the head and deputy head of the department without reference to the Commission, the Commission may make such inquiries and appoint such an examination or test to determine the qualifications of the persons so nominated as it may deem necessary for an intelligent and responsible discharge of its duties.

#### PROMOTIONS IN THE INSIDE SERVICE.

18. A candidate who is recommended by the head of a department for promotion, other than from the Third to the Second Division, in order to receive the prescribed certificate of qualification, must satisfy the Commission of his ability to perform the duties of the position to which he is to be promoted. For this purpose the Commission, if it considers an examination necessary, may, after consultation with the deputy head of the department in which the promotion is to take place, prescribe a promotion examination, having regard to the requirements of the subdivision to which the promotion is to be made, and the special duties of the position to be filled.

19. Where there are two or more persons in the employment of a department who are eligible for promotion to any vacant position, the Commission may, at the request of the head of the department, provide a competitive promotion examination limited to those who are declared eligible for promotion. Such an examination shall have regard to the requirements of the subdivision to which the promotion is to be made, and the special duties of the position to be filled. Upon the results of this examination, if satisfactory, the Commission shall issue the required certificate of qualification.

20. Candidates, who, under subsection 2 of section 26 of the Civil Service Amendment Act, 1908, are nominated by the head of a department for promotion from the Third to the Second Division must, in order to receive the prescribed certificate of qualification, satisfy the Commission that they are entitled to enter the Second Division. To this end, the Commission, after consultation with the head or deputy head of the department in which the promotion is proposed, shall prescribe a non-competitive promotion examination which, while having special reference to the requirements of the positions to be filled, shall nevertheless insure a qualification substantially equivalent to that required in the open competitive examination for entrance to the Second Division. Such non-competitive promotion examination shall include all of the subjects in group A under regulation 12, any three of the subjects in group B under regulation 12, and two papers on the work of the department in which the candidate for promotion is engaged. The minimum percentages required for passing on the subjects included in group A shall be not less than forty per cent of the marks assigned to each subject and sixty per cent of the marks assigned to the whole group. The minimum percentages required for passing on the subjects selected from group B shall be not less than thirty per cent of the marks assigned to each subject and forty per cent of the marks assigned to the three subjects, also that candidates must obtain at least fifty per cent on each of the papers on the work of the departments in which they are engaged. In the case of a candidate who does not obtain the minimum of forty per cent, assigned to the three subjects selected from group B, but who obtains an excess of marks above the minimum percentage required on each of the papers on the work of the department, such excess shall be added to the marks obtained by him on the subjects selected from group B for the purpose of estimating his percentage on the whole group. Where a candidate, who has obtained the aggregate marks required on the promotion examination, fails in one subject only, not being one of the papers on the work of the department, such candidate may, on the recommendation of the deputy head of the department, complete the examination by writing on that

SESSIONAL PAPER No. 31

subject alone at the ensuing examination. The minimum standard required on such subject shall be fifty per cent if the subject is in Group A, and thirty per cent if the subject is in Group B.

21. All general competitive examinations for entrance to the Service shall be advertised in the 'Canada Gazette' at least four weeks before the examinations are to take place. Special competitive examinations shall be advertised in the 'Canada Gazette' at least two weeks before the examinations are to take place. Such advertisements shall state the number of positions to be competed for, the conditions to be complied with by the competitors, the subjects to be covered by any special examinations, and the places at which the examinations may be held.

22. Within one month after the publication of the results of a Civil Service examination any candidate who considers that his answer papers have not been correctly valued, may make application to the Commission to have his papers re-read. Such application must be accompanied by a fee of \$3 in the case of the Third Division or lower examinations, and \$5 in the case of the Second Division or higher examinations. In cases where the appeal is sustained the fee will be returned.

2. The answer papers of all candidates at any Civil Service examination, after being valued by the examiners, shall be retained by the Commission for a period of six months from the date of publishing the results, and at the end of that period they shall be destroyed.

23. Every successful candidate, before receiving a permanent appointment to the Inside Service, must furnish the Commission with a certificate of good health, which shall be filled out on standard forms to be furnished by the Commission.

(2) There shall be appointed by the Governor General in Council in each place where an examination is held one or more medical examiners, from whom such certificates shall be obtained.

(3) The fees for the health certificate shall be:—For messengers, porters, sorters, packers, and for temporary clerks, two dollars (\$2); for clerks of the Third Division, three dollars (\$3); for clerks of the First and Second Divisions, five dollars, (\$5).

24. Every successful candidate, before receiving an appointment to the Inside Service, must furnish the Commission with references to at least three reputable persons who may be able to give adequate information as to the candidate's character and habits.

25. The following shall be the schedule of fees to be paid by the candidates at the several examinations held under the direction of the Commission:—

In 1534, France, having recovered from disasters of wars, undertook fresh enterprises in the New World. On April 20th of that year, Jacques Cartier, a native of St. Malo, set out from that place for the new land with a commission from the King and two vessels of about sixty tons each. Sailing through the Strait of Belle Isle, he scanned the barren coast of Labrador and made almost a complete circuit of Newfoundland. Turning southwestward, he passed the Magdalen Islands, and on a glorious July day entered a large bay. The heat inspired the name 'des Chaleurs' which he gave to it and which it bears to this day. On the rocky headland of Gaspé he landed and, erecting a huge cross bearing the fleur-de-lis of France, took possession of the country in the name of his sovereign, Francis I.

Ennything that is not uzed bekums rusted. It is trew of awl parts of the bodie that what is not properly exersised looses its power and its life. If you do not exercise your mussels, they will devour the strenth of your bodie. So also the mined that does not continually studie and lern does not remane blank, but fills up with a grate masse of untruthes wich distroy it. Ignorence is the rust of the mind. It is fully as hard on the sitem to have nothing to do as too bee overworked; wurse indead to rust out than to ware out. The man who is not actuely putting fourth his power looses that power. If he will not have faith, he will have worry. If he will not work for others, his own hapiness will be connsumed in the slow fires of selfishnes. Work, therefore, befor the rust can gaine a hoald.

## DICTATION.

Time: 30 minutes.

NOTE.—This paper should not be seen by the candidates. The Examiner will read over the whole extract once, and then reread it slowly and distinctly, indicating to the candidates the occurrence of each full stop. A third reading of the whole extract may be given if sufficient time remains. The whole time occupied should not be more than half an hour.

The conditions of the climate at the coast are very suitable for the production of fruit. Apples, pears, plums, and cherries bear plentifully. These fruits can be grown to better advantage on the higher lands and on small pieces of ground which can be worked on the sides of the mountains, than on the more level valley lands. The total space of ground in the province on which fruit can be grown is practically unlimited. Plums and cherries produce immense crops with very little effort, and raspberries, blackberries, currants, gooseberries, and strawberries, are all grown with satisfactory results. The summers are so temperate along the Pacific coast that there is not always a sufficient amount of heat to ripen the better sorts of outdoor grapes, but in the drier interior valleys the summers are warmer, and there many varieties of grapes and peaches ripen well, while where enough water can be had, nearly all the fruits which are grown on the coast do very well.

## ARITHMETIC.

Time: 1½ hours.

NOTE.—The work of each question must be given.

There was a time when agrecultural questuns were largely rellegated to the country; but we have begun to see that the cundishun of our farms and farmers, the prossperitie of the country is a mater of as great impotence to the dwellers in towns and cities as it is to those more nerely afected thereby, and we find that the peopel of Ontario are asuming a diferent attitde to maters pertaning to agrecultur, and are begining to plan a more rashunal development of our agrecultural asets. We are begining to reelize that in this country we have resorces unsirpased if not unequaled by any other.

In transportation maters we have atempted some of the gratest undertakings in the world. In the construckion of our railroads, canels and harbours we have perhaps acomplished as great enjinerig feets as any people. These undertakings have been caried out rapidley and sucessfully becose back of them have been shrude, entirprizing men who have seen the posibilities, made the plans and by their strong combination have pushed them to compleeshun.

But with agrecultural developement we find there is no one person or groop of persons so vitely interested as to get behind the movment and keep it going. The only way in which we can devellop this our gratest aset, is by getting into the minds of our intelegent progresive people who have their hands upon the right forses, the extente and posibilities of our agrecultural resorces, and then as a unighted boddy they may bring out of them the most possiblle.

A modern wooden ruin is of itself the least interesting, and at the same time the most depressing, object imaginable. The massive structures of anti-quity that are everywhere to be met with in Europe exhibit the remains of great strength, and, though injured and defaced by the slow and almost imperceptible agency of time, promise to continue thus mutilated for ages. They awaken the images of departed generations and are sanctified by legend and tale. Bnt a wooden ruin shows rank and rapid decay, concentrates its interest on one family and has no historical importance or ancestral record. The poet finds no insp-iration in it and the antiquary no interest. It speaks only of death and decay, of recent calamity, and vegetable decomposition. It has no strength, no grace, no beauty, but looks deformed, gross and repulsive. Even the faded colour

of a painted wooden house, the tarnished gilding of its decorations, the corroded iron of its fastenings, and its crumbling materials, all indicate recent use and temporary habitation. It is but a short time since this mansion was tenanted by its royal master, and in that brief space how great has been the devastation of the elements! The forest is fast reclaiming its own, and the lawns and ornamented gardens, annually sown with seeds scattered by the winds from the surrounding woods, are relapsing into a state of nature, and exhibiting in detached patches a young growth of such trees as are common to the country.

There was a time when agriculture was largely relegated to the country; but we have begun to see that the condition of our farms and farmers, the prosperity of the country is a matter of as great importance to the dwellers in towns and cities as it is to those more nearly affected thereby, and we find that the people of Ontario are assuming a different attitude to matters pertaining to agriculture, and are beginning to plan a more rational development of our agricultural assets. We are beginning to realize that in this country we have resources unsurpassed if not unequalled by any other.

In transportation matters we have attempted some of the greatest undertakings in the world. In the construction of our railroads, canals and harbours we have perhaps accomplished as great engineering feats as any people. These undertakings have been carried out rapidly and successfully because back of them have been shrewd, enterprising men who have seen the possibilities, made the plans and by their strong combination have pushed them to completion.

But with agricultural development we find there is no one person or group of persons so vitally interested as to get behind the movement and keep it going. The only way in which we can develop this our greatest asset, is by getting into the minds of our intelligent progressive people who have their hands upon the right forces, the extent and possibilities of our agricultural resources, and then as a united body they may bring out of them the most possible.

## REPORT OF PAUL WALLARD, AGENT IN FRANCE.

PARIS, July 1, 1904.

The Superintendent of Immigration,  
Ottawa.

SIR,—The first annual report which I have the honour of submitting to the department, covers only a period of ten months, as my nomination to the district of France is dated September, 1, 1903, and my work here virtually began with the visit to Europe, in February last, of the Deputy Minister.

Before coming over, I was directed by the department to go and visit in detail the different districts open to colonization in the North-west, as well as in the eastern provinces, so that I could furnish better information to intending immigrants. Two months were devoted to that study before I left Canada.

It was impressed upon me by the department that nothing should be done, directly or indirectly, which might infringe on the French emigration laws.

I am always obliged to show clearly under what conditions an immigrant of the right stamp will succeed in Canada. By so doing, we must necessarily attain the other and most desirable result, of deterring the unfitted from going out, and as people of this last category had been more numerous than those of the other, it was evident that, by following such a course, we were running the risk of a diminution as far as quantity is concerned. But in a matter of such importance as immigration, the question of quality comes first, as one single colonist who succeeds, is worth to us a host of dissatisfied immigrants who would sooner or later find their way back to France, and abuse Canada ever

after. Therefore, I went on to work, exerting my utmost care and judgment to deter all applicants not belonging to the agricultural class, which is assured of success in our country. To such people the Canadian government is ready to guarantee immediate employment upon landing, at wages much higher, generally, than anything they can obtain anywhere in Europe, until they are in a position to avail themselves of the offer of 160 acres of free-grant land.

At the time of the Deputy Minister's visit, I travelled with him through different districts, including Brittany, part of Normandy and some sections of Central France. Everywhere we met with a favourable reception. At Nantes, a most cordial welcome was awaiting us. A banquet was tendered to the representative of the Canadian government, at which the Mayor, the President of the Chamber of Commerce of the great western city, and many influential people were present. This visit through France could not but confirm the Deputy Minister in the opinion he had frequently expressed, that the French peasant was undoubtedly a most desirable element for our country, and therefore that the advantages offered by Canada should be brought prominently to the notice of these people, many of whom find it an almost impossible task to raise their families at home, and whose greatest hope is in emigration.

Under these conditions, a series of lectures in the districts where the demand for information about Canada had been most active was considered a likely way to accomplish our object. This course has been followed in more than forty different places. In these lectures and in my personal interviews with people, as well as in my correspondence, I never lost sight of the restrictive orders received from the department. I therefore sincerely believe that our work in France, instead of creating alarm, has been instrumental in developing a totally different feeling, inasmuch as our efforts had for sole object the promoting of a better knowledge of Canada. As for the results, the course which has been thus followed was crowned with a success which I did not anticipate or hope for. Moreover—and this is the important point—the French immigrants landed in Canada this season were considered first-class. This has been frequently remarked to me by the Dominion immigration agents. Of the numerous emigrants sent this season, many wrote me letters bearing evidence of their satisfaction at being now settled in our country. They met with the kindest reception from the government agents, and through them were able to find immediate employment; those who were desirous of establishing themselves received all necessary help and assistance.

We cannot give a correct estimate of those who left France for Canada until the official returns, taken from the entries at Canadian ports, are published. Many an emigrant, after inquiry at our office, will take his final decision without seeing us again, and purchase his tickets from local maritime agents. The official statistics will show the exact number of immigrants travelling third class, but will not include those travelling first-class, who are, of course, beyond our control, though many of them, properly speaking, are immigrants.

The details of the advertising campaign I should follow were left to my judgment, with the understanding that I should exercise a wise and prudent economy. I thought it advisable, principally at first, not to give our offer of information an importance which might attract too much attention. Though my advertising bill did not reach a high figure, I think I have distributed it so that the results will show the definite form we should ultimately adopt. In many cases I have arranged with the newspapers in which I had inserted advertisements, that clippings from our pamphlets and articles favourable to the Canadian cause be published gratuitously.

As Canada is better and better known abroad, as the success obtained by previous French immigrants can be offered as an evidence that the promises contained in our immigration literature are based on reliable facts, I can certify that our country will continue to enjoy the good will of the French press. More-

over, many an old prejudice, due to some previous and unhappy experiments in other countries, will disappear when it becomes known as an unquestionable fact, that by emigrating to Canada the French agriculturist, with little or no money, but with courage, energy, and, above all, perseverance, will find there a comfortable and prosperous life.

Our general correspondence thus far, including inquiries about Canada and letters applying for tickets, has reached a total of more than 3,000 letters, requiring, of course, an identical number of answers. We have distributed a great quantity of immigration literature, with which the department has kept my office regularly supplied, authorizing, besides, the printing of a pamphlet especially adapted to French needs. This pamphlet has already helped me considerably in my work.

I am very much indebted to the London office for the kindness shown to me in every circumstance.

I need not say I will endeavour to remain worthy of the confidence reposed in me, directing all my efforts towards a continuance of the success I have met so far in the accomplishing of my mission in France.

Your obedient servant,  
PAUL WIALARD.

## FARMERS' LIST OF BEST VEGETABLES.

The Farmers' List of Best Vegetables, which has been published from time to time in the annual report, has been very much appreciated. This list is really a summary of the variety tests, and gives, in a comparatively small space, the names of those vegetables which are considered the best. The following list has been revised up to the autumn of 1910:—

*Brussels Sprouts.*—Improved Dwarf. The dwarf varieties have been found more satisfactory than the tall-growing ones.

*Cabbage.*—Early Jersey Wakefield (early), Succession (medium), Danish Ballhead and Drumhead Savoy (late), Red Dutch (red) is a good list. Houser has been found freer from disease than most. For extra early use, Paris Market is desirable, being nearly a week earlier than Early Jersey Wakefield.

*Cauliflower.*—Early Dwarf Erfurt and Early Snowball.

*Carrots.*—Chantenay is one of the best, but if a good extra early sort is required, the Early Scarlet Horn can be planted to advantage. It is a small variety.

*Celery.*—Golden Self-Blanching (Paris Golden Yellow) (early), French Success, Noll's Magnificent, Perfection Heartwell, Triumph, Winter Queen are all good late varieties. London Red is a good one.

*Cucumbers.*—Peerless White Spine or White Spine, Davis Perfect, Cool and Crisp, and Giant Pera are some of the most satisfactory. Boston Pickling and Chicago Pickling are good pickling sorts.

*Egg Plant.*—New York Improved and Long Double Purple succeed best.

*Lettuce.*—Black-seeded Simpson (early curled), Iceberg, New York, Giant Crystal Head, Crisp as Ice, and Improved Hansen (curled cabbage), Improved Salamander (uncurled cabbage). Grand Rapids is the best variety for forcing. Iceberg remains headed longest in summer. Trianon and Paris are two of the best Cos varieties.

## SESSIONAL PAPER No. 31

*Melons, Musk.*—Long Island Beauty and Hackensack are two of the earliest and best of the Nutmeg type. Montreal Market is later, but of larger size and finer flavour. Emerald Gem and Paul Rose are two of the best yellow-fleshed melons.

## PART II.—THE IRRIGATED FARM.

The yields of grain on the irrigated farm were all relatively low, the principal cause for this being the high mean temperature during the Months of April, May and June, and the windy weather that prevailed during a good part of this time. The way the season turned out, to have obtained the best results it would have been necessary to irrigate the grain the latter part of May or early in June. This was a course we hardly cared to risk, for two reasons: First, because it injures grain to flood-irrigate it in the spring before it is through stooling, and second, because, if the land had been flooded at this time and the usual rains had occurred which almost invariably come at this season of the year, the grain would have been seriously injured by too much wet. In such a season it would be almost impossible to have obtained particularly large crops, no matter when the irrigation was done. Land that had been irrigated the previous fall, was, of course, in much better condition to withstand the unusually dry conditions of the spring. But very little of our land was so treated.

## EIGHTY WORDS PER MINUTE.

The Indian agent reports as follows upon the work of the school and the results upon the reserve:—Whenever I | visit this school, I find its appearance very satisfactory. The health of the children is very good. Although the measles | broke out in the school, no deaths were reported. One boy died of some other complaint. The children seem to | be happy and contented while at school, but whenever they take their vacation, it is a hard matter to have | them return. The reason, in my opinion, is that an Indian child, no matter how well he may be treated | at any school, when he goes home, does not like to leave his parents. Consequently, when the vacation is over | and children return to school, their whole mind is on their parents for about two weeks, and during that time | they think of nothing else but running away, as I have noticed that all the desertions that occurred took place | shortly after the vacation. Both the boys' and girls' apartments are very nicely kept, very clean, up-to date and | in order, and great interest seems to be taken in the school by the teachers and principal. The progress of | the different classes is good. I received several letters from the children of the school since my appointment, and their | composition, handwriting and spelling are very good indeed. As a rule, Indian children make a wonderful advance in their studies | in the first year or two.

## ONE HUNDRED WORDS PER MINUTE.

This school is located on the reserve near the Riding mountains. The river runs through the reserve not far from the school. The school is | very prettily situated on the north side of the valley through which this river runs. This school was visited on June 9, 1910. | The school building is 18 by 27 feet, with a porch 6 by 9 feet. It is built of logs, which are painted, and | the building on the outside has a neat appearance. Inside of the school the walls are papered. The school-room requires to be painted, and | it will take two coats to make it look well. The chimney is built of brick and is in good order. The floor is showing | signs of wear, and will soon require renewing or repairing. There is a small kitchen stove in the porch of this building which is being | used every day for the purpose of giving a hot meal to the pupils at the noon hour. There is just a hole in the | roof of the porch, through which the pipe runs. This is not safe, and I would suggest that a small iron chimney should be put | in this porch roof. At present, whenever it rains, the rain comes down upon the stove and into the porch. Of course, in the winter-time, | this cook-stove can be put in the school-room proper, as there is plenty of room. There are plenty of books and school material | for the purposes of the school. The school is well lighted, having four 12-pane windows, which give plenty of light. The teacher is doing | fairly well, but really no progress is seen since last year, owing to the irregular attendance. The average attendance for the last quarter was three. |

Allmost magikal as was the change thus sudenly efected in the aperence of the garison, it was not the most intresting feature in the exciteing seen. Sir George is wholly suave, courteous and genial, "his plumage never seems to be ruffled." He does not impress one as being reserved though knowing how to keep his counsel, awaiting the precise moment for clinching the final argument in favour of peace. He adopts rational means of conciliation and moves among the representatives of capital and the leaders of organized labour as an expert official who is the embodiment of justice to all. As a diplomatist he recognizes that capital and labour are connected by common and universal interests.

## MOST GRACIOUS MAJESTY:

We, Your Majesty's dutiful and loyal subjects, the Commons of Canada in Parliament assembled, beg leave most respectfully to represent—

That in the year 1867 by Act of your Imperial Parliament commonly known as the British North America Act, the then existing provinces of Canada,

Nova Scotia and New Brunswick were federally united and formed into one Dominion under the name of Canada, and the constitution of the legislative authority of such Dominion provided for and the nature of its executive government declared, and since the said act other provinces in British North America have also been federally united to the said Dominion and now form part thereof, with representation in the House of Commons pursuant to the provisions providing therefor in the said British North America Act and amending, and other Acts subsequently enacted;

That by the said British North America Act the executive government and authority in and over Canada is declared to continue and be vested in Your Majesty and Your Heirs and Successors, Kings and Queens of the United Kingdom of Great Britain and Ireland, and Your Majesty is represented in Canada by a Governor General;

That by the said British North America Act there is also a council to aid and advise Your Majesty, styled the King's Privy Council for Canada, the members of which council are from time to time chosen and summoned by Your Majesty's said Governor General and may be from time to time removed by the said Governor General;

That by the said British North America Act the Parliament of Canada consists of your Majesty, an upper House styled the Senate and the House of Commons, but with powers not to exceed those at the passing of the said Act held and exercised by the Commons House of Parliament of the United Kingdom of Great Britain and Ireland;

That by the said British North America Act it is also provided that Bills for appropriating any part of the public revenue or for imposing any tax or impost shall originate in the House of Commons and that no such Bill or vote, resolution or address for such appropriation or tax or impost shall be adopted or passed that has not been first recommended to that House by message of Your Majesty's said Governor General in the Session in which such Bill or vote, resolution or address is proposed;

That by the said British North America Act it is also provided that where any Bill passed by the House of Parliament is presented to Your Majesty's said Governor General for Your Majesty's assent, he shall declare according to his discretion but subject to the provisions of the said Act and to Your Majesty's instructions, either that he assents thereto in your Majesty's name, or that he witholds Your Majesty's assent, or that he reserves the Bill for the signification of Your Majesty's pleasure, and that where he assents to a Bill in Your Majesty's name if Your Majesty in Council within two years after receipt thereof by the Secretary of State thinks fit to disallow the Act such disallowance shall annul the Act, and that a Bill reserved for the signification of Your Majesty's pleasure shall not have any force unless and until within two years from the day on which it was presented to Your Majesty's said Governor General for Your Majesty's assent he signifies to the Houses of Parliament or by proclamation that he has received the assent of Your Majesty in Council;

That by the said British North America Act legislatures for the various provinces constituting the said Dominion of Canada are also established, each governed by a Lieutenant Governor appointed by Your Majesty's said Governor General in Council for five years, and whose salaries are required to be fixed and provided by the parliament of Canada and such Provincial Legislatures are empowered exclusively to make laws in relation to a large number of matters and subjects of great importance, subject to the disallowance by Your Majesty's said Governor in Council within one year, but not in any way subject to consent also by the said Senate;

That in regard to all matters and subjects not within the said exclusive power of the said Provincial Legislatures it is provided by the said British North

SESSIONAL PAPER No. 31

America Act that all laws to be made by the said Parliament of Canada must be consented to and passed by both the Senate and the House of Commons, before being presented to Your Majesty's said Governor General for assent and the members constituting the said Senate are appointed for life and not subject to election or rejection by the people, and the members of the House of Commons are elected by the people every five years or at any less period at which Your Majesty's said Governor General may dissolve the Parliament;

That during the forty years since the said British North America Act has been in force much dissatisfaction has been caused from time to time to Your Majesty's loyal subjects in Canada by the actions of the Senate in regard to matters dealt with by the House of Commons and the rejection of laws sought to be made by the people through their representatives in the House of Commons and passed by the House, and by reason of the heavy expense and burden of taxation placed upon the people to provide for the maintenance of that two-fold system of dealing with the making of laws by the Parliament of Canada;

That in view of the many other provisions heretofore referred to for guarding against and disallowing any ill-advised or improper legislation which might by any possibility pass the said House of Commons, and of the aforesaid dissatisfaction of the people and heavy burden of expense involved and of the great advance made in education by the whole people of Canada since the passing of the said British North America Act, this House is of the opinion that the Senate is no longer required or advisable for the properly carrying on of responsible government in Canada, or safeguarding of Your Majesty's full Rights and Prerogatives; and that the abolition of the said Senate would greatly conduce to the welfare of the Dominion of Canada and promote the interests of the British Empire.

We therefore respectfully pray that the said British North America Act be so amended as to provide for the abolition of the said Senate.

Step by step I followed the prints; until, a quarter of a mile farther, I beheld them die away into the southeastern boundary of Graden Floe. There, whoever he was, the miserable man had perished. One or two gulls, who had, perhaps, seen him disappear, wheeled over his sepulchre with their usual melancholy piping. The sun had broken through the clouds by a last effort, and coloured the wide level of quick sand with a dusky purple. I stood for some time gazing at the spot, chilled and disheartened by my own reflections, and with a strong and commanding consciousness of death. I remember wondering how long the tragedy had taken, and whether his screams had been audible at the pavilion. And then, making a strong resolution, I was about to tear myself away, when a gust fiercer than usual fell upon this quarter of the beach, and I saw, now whirling high in air, now skimming lightly across the surface of the sands, a soft black felt hat, somewhat conical in shape, such as I had remarked already on the heads of the Italians.

##### 2. *Translate into English:*

Ce lieu n'avait pas encore dépouillé son aspect sauvage. La hache du défricheur n'avait encore fait que de rares trouées dans le vaste manteau de forêts qui ombrageaient les rives du fleuve et de la rivière. Ça et là, au milieu des éclaircies, s'élevaient quelques maisons entourées de troncs d'arbres calcinés, dont les noires silhouettes se détachaient en relief sur la verdure des moissons qui croissaient dans les intervalles. Sur la lisière du bois, des arbres renversés, des amas de branches prêtes à être brûlées, attestaient le travail incessant du bûcheron.

La nouvelle échelle réduit, dans une proportion considérable, les dénominations d'emplois qui étaient extrêmement nombreuses à l'ancien Réseau de l'Ouest, et qui, par leur multiplicité, compliquaient les diverses opérations de personnel. Tous les agents chargés, dans les divers services, de fonctions équivalentes, ou pouvant être hiérarchiquement assimilés les uns aux autres, auront désormais le même titre ou feront partie du même de groupe de l'Echelle.

D'autre part, ont été éliminées toutes les dénominations correspondant plutôt à des professions d'ouvriers qu'à des emplois d'agents: lampistes, ouvriers lampistes, ouvriers des équipes volantes de la voie, etc. Ces emplois figurent désormais dans la nomenclature des professions d'ouvriers, et les titulaires seront soumis au statut spécial de ce personnel. Ils continueront à faire partie du personnel commissionné ou classé, et il n'en résultera pour eux aucune diminution de situation.

Enfin, l'échelle de 1900 du Réseau de l'Etat comprend un titre II réservé à une catégorie d'agents dits "agents Classés." Or, les emplois réservés à ces agents sont, les uns des postes d'attente, tels que ceux de stagiaires, surnuméraires, agents à l'essai, aspirants, par lesquels doivent passer les débutants, selon leur âge ou leurs titres et diplômes; les autres des postes confiés à des femmes, veuves ou femmes d'agents en service, retraités ou réformés, admises en cette qualité en dehors des règles générales de recrutement imposées aux autres postulantes. Les salaires ou indemnités attribués à ces catégories d'agents dépendent, soit, du traitement minimum que seront appelés à recevoir les intéressés après leur titularisation, soit du service spécial qu'ils ont à assurer.

## COAL.

Coal consists of vegetable matter which has been buried out of contact with the air in past ages, and has then undergone a series of slow chemical changes, the general result of which is to get rid of a large proportion of the hydrogen and oxygen, and to increase the relative proportion of the carbon in the remaining substance.

The kind of coal called anthracite contains the greatest amount of carbon. It is shiny on the surface, does not soil the fingers, is hard to light, burns with little or no flame, and produces an intense heat when burning. Coke is an artificial product which much resembles anthracite.

The grade of coal which contains the next highest amount of carbon to anthracite is the ordinary bituminous coal.

Lignite, or brown coal, contains much less carbon than the other kinds, and the vegetable matter is present in much greater quantities.

(a) CALCUL TRÈS JUSTE.

Un enfant pleurait et criait. On lui demanda ce qu'il avait. "C'est," répondit-il, "que j'ai perdu une pièce de deux sous dont ma mère m'avait fait présent," — "Allons", lui dit-on, "la perte n'est pas si difficile à réparer; ne pleure plus, en voilà une autre." A peine l'eut-il reçue qu'il se mit à crier et à pleurer plus fort qu'auparavant. On lui demanda de nouveau: "Pourquoi

pleures-tu donc encore?" — "Je pleure, parce que je pense que, si je n'avais pas perdu mes deux sous, j'en aurais quatre à présent."

(b) DU PAREIL AU MÊME.

Napoléon trois, empereur des Français, cause un jour avec sa femme, l'impératrice Eugénie.

Comme elle parle un peu étourdiment, son mari demande par manière de plaisanterie:

"Quelle est la différence entre un miroir et vous-même?"

L'impératrice cherche en vain une réponse à cette question.

"Eh bien, continue Napoléon, la différence est que le miroir réfléchit et que vous ne réfléchissez pas."

"A votre tour, riposte vivement Eugénie, quelle est la différence entre un miroir et vous-même?"

L'empereur reste muet de surprise.

"Eh bien, mon ami, c'est que le miroir est plus poli".

(c) LES DEUX BRINS (*blades*) D'HERBE.

Un jour, au milieu d'un herbage (*meadow*),

 —"Moi, ma taille (*figure*) plus frêle,"  
 Me donne un air plus gracieux."  
 Ainsi se prolongeait cette vaine dispute,  
 Quand tout à coup, au plus fort de la lutte (*quarrel*),  
 Un bœuf les tondit (*cropped*) tous les deux.

At an early date, action was taken to improve the rivers of Canada so that they might serve as commercial highways. Vessels of 500 or 600 tons could journey up the St. Lawrence River as far as Montreal, but beyond that were the St. Louis Rapids, which put an end to further progress. Beyond these rapids large vessels could sail up for some distance; before they reached Kingston, however, at the foot of Lake Ontario, some forty miles of rapids intervened. It was plain sailing over the Great Lakes, but between Lake Ontario and Lake Erie there was a distance of 27 miles, in the course of which the ascent was 300 feet, and the frowning front of Niagara Falls lay before them. After entering Lake Erie, they had free course through Lakes Erie, Huron and Michigan, but the way to Lake Superior was barred by the Sault Ste. Marie.

A great many people who believe the saying, "Honesty is the best policy," think that they are safe enough so long as they can be dishonest without being caught. This idea, however, is not based on fact. In the first place, every dishonest act that a person commits, no matter whether it be seen or unseen, is certain to produce a tendency towards more dishonesty on the part of the person who has been cheated, and while we may believe in cheating other people, no one believes in being cheated himself. Nor is this the worst result. Just as every moment of dissipation weakens the athlete who is preparing for a trial of his strength, so every act of dishonesty or deception weakens the moral fibre of any man who will someday be called on to perform a task demanding all the moral power he has. Never make the mistake of supposing that it pays to be dishonest.

The surface is level, with stretches of prairie covering large districts, intersected here and there by valleys of considerable width in which run rivers and streams, the banks of the valleys being usually fringed with trees. Winter sets in during the latter part of November, and is usually over by the end of March, although occasional night frosts occur for several weeks later. Any sturdy settler with care and perseverance soon succeeds in getting his land in crop. The greater part of the soil is a deep, rich vegetable mould of great fertility. The proportions of the more important elements of plant-food which exist in this soil, judging from a number of chemical tests which have been made, are about double those found in what is regarded in Europe as good soil. The principal grain crop is wheat, which is produced of excellent quality.

The simplicity and sincerity of a great man of letters have rarely been more clearly or attractively revealed than in the published correspondence of Sir Walter Scott. The enormous productivity of the great novelist was conditioned on long and arduous work, and it would seem as if a man who was pouring out through so many years an unbroken stream of narrative would have become in interest and habit, no less than in occupation, a story-writer and nothing else. But this is precisely what Scott did not become. The smell of ink is never upon his garments, he seems to care for nothing under the Scotch heavens except books. Professionalism never gets the better of him, and he goes on to the tragical but noble end telling stories like a true-hearted man rather than like a trained novelist.

One can imagine his scorn of literary fads and of those who follow them, for literature was to him not a matter of phrases, and mannerisms, and social conventions; it was as simple as nature and as much out of doors as the Highlands whose secrets he discovered. There is a fine unconsciousness of any special gifts or calling in his letters, he writes about himself as about all things in a natural key. Other and lesser men may squander body and soul for a few new sensations, a little addition to literary capital; Scott remains sane, simple, and wholesome to the last.

1. (a) Write a letter, as from a tenant to his landlord, requesting that certain repairs be made to your house.
  - (b) Write the reply of the landlord, promising to make some of the repairs, but declining to make the others except at a higher rental.
2. Read carefully the following letter, and express the substance of it in a few well-constructed paragraphs. The synopsis should not exceed *one and one-half* pages of the answer-book. Candidates are requested to give attention to spelling, writing, punctuation, grammar, and style.

The virtues of conciliation and arbitration, as a means of preventing industrial strife, were brought out as strongly in the settlement of this dispute as were their efficiency and adequacy as a means of terminating existing disputes in the four previous settlements under the Act. Whilst strikes had occurred at the mines where no recourse was had to conciliation or arbitration, at the mines of the Dominion Coal Company, where the matter was settled by arbitration under the provisions of the Miners' Act, and at the mines of the Nova Scotia Steel Company, where a settlement was effected by conciliation under the Dominion Conciliation Act, there was not a single hour's cessation of work, and what is of even greater importance, the relations of the parties, instead of becoming more strained, as frequently happens in the case of a strike or lock-out, were harmonized.

The settlements effected under the Act in all of the above-named cases are such as justify merited commendation of the importance to the country of this legislation, and of the possible advantages which may be expected to accrue from it in the future. There is no doubt that but for the machinery provided by the Act, and its speedy application to the existing difficulties, where the same was requested, a prolongation of the disputes was all but inevitable, and it is difficult to say what more grave and serious consequences might have followed from the conditions at the time being as critical as they were. That more would have been accomplished by a settlement in the end by the parties themselves is hardly probable. That a pecuniary loss to employers and employed alike would, in the meantime, have continued, is certain. That the relations between them would have become more strained, and not only existing, but future questions have been rendered more difficult of adjustment in consequence, is altogether likely, while the serious possibility was ever present that, under such circumstances, the number of those thrown out of employment might have increased because of the inadequacy of one branch of employment to meet the needs of another; or, regard being had to the intricacy of industrial relations, other industries might have become embarrassed because of the

4 GEORGE V., A. 1914

embarrassment of the industry upon which they were either wholly or in part dependent.

That the speedy settlement of existing difficulties has had a beneficial effect upon the community in which the strike existed must also be apparent. In one case intervention was asked on behalf of the strikers by the mayor of the municipality. In another case, the mayor of the municipality presided at the meeting of the strikers when the terms of settlement were being discussed with them, showing that the corporation felt itself called upon to take an active interest in the matter; while in the case of the Valleyfield strike, the municipality, apart from the effect of the strike in other ways, was financially concerned, because of the expense which the presence of troops in its midst involved. What was saved to the company, to its several hundred employees, and to the towns in the vicinity in consequence of a settlement, without a strike, of the difficulties in Cape Breton, is hard to estimate, but the gain must have been of a very substantial character.

A perusal of the statistical tables on strikes and lock-outs published monthly in the *Labour Gazette* will show that in several instances, notably the lock-out in November, 1900, in the boot and shoe industry at Quebec, involving a large number of industrial establishments and several hundred employees; the dispute of the employees of the Dominion Coal Company in January, already referred to; the strike of the boilermakers and helpers at Toronto in May, 1901; the strike of the carpenters at Halifax in June, 1901, and that of the shoe-workers at Quebec in June, 1901, conciliation and arbitration have been effective in bringing about a settlement of existing difficulties.

Arbitration and conciliation have unquestionably come during the year to be better known and more appreciated in this country as a means of preventing and adjusting industrial difficulties, and it is not unreasonable to expect that they will continue to be increasingly important factors in the furtherance and preservation of industrial peace.

One can imagine his scorn of literary fads and of those who follow them, for literature was to him not a matter of phrases, and mannerisms, and social conventions; it was as simple as nature and as much out of doors as the Highlands whose secrets he discovered. There is a fine unconsciousness of any special gifts or calling in his letters, he writes about himself as about all things in a natural key. Other and lesser men may squander body and soul for a few new sensations, a little addition to literary capital; Scott remains sane, simple, and wholesome to the last.

## EIGHTY WORDS A MINUTE.

In this case, which was heard yesterday, the Board have had an opportunity of discussing the facts that were developed | and of considering them, and have arrived at a conclusion which may as well be announced at the present moment. | Miss Carter, in her written complaint, states that she is a trained nurse, and, from what was said yesterday, it | appears that she is practicing her profession as such in this city. She has a telephone at her residence. In | her complaint she says that her house telephone is used incidentally, the same as a professional or a business man | uses his on private business, and also professionally in a casual way. Her business use of the telephone would average | about once a week. The company insists on charging her at the same rate as for a business telephone, namely, | \$45 per year, instead of \$25 per year, her contention being that under the circumstances disclosed the | company is in error in charging her \$45 per year and classing her among the body of telephone | subscribers known as business subscribers, and that she should be charged upon the basis of \$25, instead of | \$45 per year. The question is not free from difficulty. It would appear from the facts as presented, | that for business use, telephone subscribers are put in the one class and are all charged the higher rate mentioned. |

## ONE HUNDRED WORDS A MINUTE.

This lady uses her telephone for the purposes of her profession or business as nurse. It is true, it would appear from what was said | yesterday (and the facts were not controverted) that the telephone is not used very frequently; and one can well understand that possibly a nurse, being | engaged on some important and serious case, might be absent from her home or place of business for one, two, or three months at a | time, during which time her telephone would be of little or no use to her in a business way, and probably would be used only | for the purpose of communicating with the other inmates of her house. But it seems to us impossible that a business telephone may become a | non-business telephone because of its infrequent use. One man may use his telephone for business purposes 50 times a day; another man may not | use his telephone for business purposes once a week. There is no way of distinguishing between those two telephone subscribers. In one feature of it, | it seems to some extent inequitable, that the man who uses his telephone once a week should pay as much as the man who uses | his telephone 50 times a day, but, after all, the telephone is there for his purposes. It is open to be used by him, if | his business demands the use of it, just as much as is that of his neighbour. It seems to us that it is impossible to | deal with cases of this sort in other than a broad way—that every telephone that is used for business purposes should be put in | the business class. Everybody knows that professional and business men use their house telephones for business or professional purposes. |

Copy the following:

With the progress of invention, new enterprises are continually supplanting or injuring our old ones, to the ruin or loss of those interested in the latter. Railways have not only directly affected in this way former modes of transportation, but they have also been instrumental in building up particular localities or enterprises at the expense of others. It has never been the policy of the law to afford compensation for losses thus occasioned. When the legislature authorizes the construction of new lines of railway in competition with those formerly existing, this is not done with a view to benefit the promoters of the new lines or to injure those interested in the old ones, but solely for the public good.

The provisions of the Railway Act which require railway companies thus to interchange traffic at connecting points are introduced, not for the purpose of benefitting one railway company at the expense of another, but solely in the interest of the public. The law cannot recognize anything in the nature of a good-will of the business of either railway company thus affected for which another should give compensation. In my opinion, the division between railway companies of the joint rates for traffic thus interchanged should be made upon the principle of giving reasonable compensation for the services and facilities furnished by the respective companies in respect of the particular traffic thus interchanged, and not by reference to the magnitude of the business of one company or the other at particular points, or the respective advantages which each can offer to the other there, or a comparison of the loss which the one is likely to sustain with the gain likely to accrue to the other from the giving of the facilities which the law requires.

The complaint was that the tolls charged by the respondent company on coal both east and westbound from Lundbreck unjustly discriminated against it and in favour of Lethbridge.

Judgment, Mr. Commissioner McLean, June 13, 1910.

The Galbraith Coal Co., of Spokane, Washington, has collieries at Lundbreck, Alberta. It is complained that the coal rates both east and westbound from Lundbreck discriminate against it and in favour of Lethbridge, Alberta, which is seventy-four miles east of Lundbreck.

The phase of the complaint concerned with the eastbound situation may first be considered. This phase of the complaint arises out of the Canadian Pacific Railway's Special Coal and Coke Tariff, C.R.C., No. W. 1296, of October 4th, 1909, which superseded Tariff C.R.C., No. W. 713. The latter tariff was admittedly built up on a series of more or less arbitrary compromises. The railway had in the first place to take care of coal movements out from Lethbridge. Then, as coal-mining and shipping points developed, these were taken care of by treating Lethbridge as a basing point and giving these new shipping points arbitraries over or under the Lethbridge rate according to their location. As a result of the complexities arising out of this situation and the complaints both of shippers and consumers, the railway put in the new tariff, some phases of which are attacked. In framing this new tariff the railway took the Alberta standard

tariff, and a special tariff, based on the mileage rate on 10th class, the class in which coal is contained, was worked out as follows:—

100 miles and less.....	66	per cent of 10th class.
200 “ “ .....	64	“ “ “
300 “ “ .....	63	“ “ “
400 “ “ .....	62	“ “ “
500 “ “ .....	61	“ “ “
600 “ “ .....	60	“ “ “
700 “ “ .....	59	“ “ “
800 “ “ .....	53	“ “ “
1,000 “ “ .....	51	“ “ “

It will be seen that the rates are tapered on the long hauls, thus giving a ton-mile rate inversely proportional to distance.

This mileage tariff is, however, modified by the introduction of a grouping comprising six groups. The groups with which the particular complaint before the Board is concerned are the Lethbridge group and the Coleman group. The essential facts concerning these may be summarized as follows;—

*Lethbridge group* (Grassy Lake to Lethbridge, fifty miles, inclusive).

Eastern point, Grassy Lake; western point, Lethbridge.

Number of points in group, 6.

Lethbridge is 74 miles east of Lundbreck.

*Coleman group* (Lundbreck to Coleman, 19 miles, inclusive, east of the divide, i.e., where mountain mileage begins).

Eastern point, Lundbreck; western point, Coleman.

Number of points in group, 8.

No one can realize without personal experience the number and variety of pleasures accessible to the resident of London. These may not be appreciated by him who has them always within his reach, but to the stranger they possess a constant and keen fascination, though there is so much to be seen, that the pilgrim scarcely knows what to choose. All old cities grow rich in association as a matter of course, but London by reason of its great extent as well as its great antiquity is richer in association than any modern place on earth. The visitor scarcely takes a step without encountering a new object of interest.

The American who having been a careful and interested reader of English history, visits London for the first time, half expects to find the ancient city in a state of mild decay, and he is consequently a little startled at first upon realizing that the Present is quite as vital as ever the Past was, and that London antiquity is in fact swathed in the robes of everyday activity and very much alive.

When for example you enter Westminster Hall you are beneath one of the most glorious canopies in the world, which was built by Richard the Second, but this old hall is now only the vestibule to the Palace of Westminster. It is observable that this structure however much its magnificence deserves commemorative applause, is deficient as yet in the charm which dwells in association.

The discovery and the discoverer of America have furnished an almost inexhaustible theme for the critic, the biographer and the historian. The life, the voyages, the brilliant triumphs and the mournful end of Columbus are familiar to most readers.

It is easy enough for the writers of the nineteenth century to criticise the actions of the fifteenth; and learned scholars sitting in luxurious easy chairs in great libraries can pass swift and severe judgment upon the acts and motives of Columbus. But to appreciate his stupendous task let them go back four hundred years and divest themselves of the bias which the science of to-day unconsciously inspires, let them leave the age of steam-engines, telegraphs, printing presses and democratic governments, let them take the place of Columbus, let them endure his trials, cherish his resolves, encounter his rebuffs, overcome his obstacles, launch out on his voyage, govern his mutinous crew, suffer his shipwrecks and struggle with his disappointments.

The age of Columbus took him as he was, full of human imperfections and frailties, but full also to overflowing with a great idea, and with a will, a perseverance, a constancy, and a faith so sublime as fairly to conquer every obstacle after a weary struggle of eighteen years, and to carry forward his arduous enterprise to triumphant success. By the power of the unconquerable mind with which nature had endowed him, he achieved a fame so imperishable that neither the arrows of malice nor the keenest pens of critics can avail to injure it.

Mr. Speaker, I am sure the thanks of the House are due to the hon. gentleman for again bringing this matter to its attention. He has evidently given the subject a great deal of thought, has accumulated considerable information, and has presented his views for our consideration in a very clear and useful manner. The subject is one which naturally enlists our sympathies, because there are few more pathetic spectacles in life than helpless old age confronted with privation and poverty. The real question, so far as Canada is concerned, is whether conditions here are such as to require what is admitted to be advanced legislation of this sort, and whether, if so, public opinion is as yet ripe for it. So far as I am aware, there has been no public agitation in Canada, either politically or through the press or otherwise, for legislation on the subject of old age pensions. It must be remembered that in Great Britain, where the old age pension system exists, it was preceded by an agitation extending over almost a generation. Agitation of that kind is necessary before legislation involving such a large expenditure can or should be adopted. While any legislation which has been adopted in Great Britain should commend itself to our attention, I am of opinion that we should not favourably consider it until we carefully compare, or contrast if necessary, the social and economic conditions existing in Great Britain and in Canada.

I think it is not an extreme statement to say that in Great Britain, in the past, poverty has been the inevitable lot of vast masses of the population. In very many instances this has been through no fault of the citizen himself. The causes for this condition have been many. They are stated to include unemployment, sweated industries, physical deterioration and excessive drinking. So precarious and so unremunerative has been employment in Great Britain that there could be no assurance, even to the sober, thrifty and industrious, that they would be able to raise their families and lay by a pittance for old age, and under those circumstances the workhouse has been the inevitable goal of great numbers of respectable, sober and industrious people—industrious if they only had the opportunity.

Owing to the stigma and contumely which would naturally attach to the receipt of charity under conditions such as these, it is not to be wondered at that in Great Britain an agitation sprang up for old age pensions, which have now been established, and I think there is very much to be said in favour of that legis-

lation. If we admit the principle of pension for those who have served the State on the battlefield, then, where, owing to economic conditions prevailing, a man has failed, and honestly failed, in the industrial strife, it might be considered even a matter of right, if he could not otherwise be decently provided for, that the State should step in and pension him when he attained a certain age—and it must also be remembered that old age itself enters as a factor into poverty. In other words, a man whose powers are waning is unable to help himself, and under the economic and social conditions prevailing in Great Britain and on the Continent, it might very properly be a subject of legislation, that men who have lived sober, honest and industrious lives, who have done their best to raise their families and take care of them, when they have attained the age of three score years and ten, or earlier, if their powers fail them, should be made an allowance from the State sufficient at least to meet the necessities of their existence. It must also be remembered, in considering the matter from the political stand-point, that in Great Britain a very large percentage of the population might reasonably feel that some day they might have to avail themselves of old age pension relief, and consequently you have a political movement in Great Britain based upon a very substantial body of public opinion, such as is not at all available for the beginning of such a movement in this country to-day.

Let us consider the case of Canada. In the first place, there is little or no unemployment in Canada. Canada to-day is among the most favoured nations on the earth. I am not sure that Canada does not occupy the leading position in the world to-day, so far as employment is concerned. Our industries are thriving, and our artisans are nearly all employed; wages are good, and, while the cost of living is high, our artisans and workmen, as a general thing, are self-respecting citizens quite capable of taking care of themselves. In the event of sickness or accident depriving a wage-earner of his power of work, or old age interfering with his efficiency and leaving him no longer able to take care of himself, we find the need supplied by provincial and municipal charity, and by the filial piety of the sons and daughters of Canadians. I desire to pay this tribute to my own countrymen, that I know of no people among whom the filial piety of sons and daughters is more likely to take care of aged parents than Canadians. It is a great credit to the sons and daughters of Canada that they are so ready to take care of their parents, and to take care of them well.

Then, in this country we have very few sweated industries, and we have, as I have said, a condition of abounding prosperity. I think that with reasonable thrift it is possible for any industrious, sober artisan to raise his family and to provide something for his old age, and, as I have said, and, in the event of sickness or accident, age is usually well taken care of, and cared for in such a way that no stigma attaches to the recipient of the charity afforded by provincial and municipal agencies. I think it is not an extreme statement to say that, on the whole, the poor of Canada are well looked after, and it is on this account, as contrasted with the conditions in Great Britain, that there has been no widespread movement, as I have said, for the old age pension in Canada.

- If two triangles have the three sides of the one equal to the three sides of the other, each to each, they are equal in all respects.  
Construct a triangle, having given the length of the three sides.

2. The opposite sides and angles of a parallelogram are equal to one another, and each diagonal bisects the parallelogram.  
If the diagonals of a quadrilateral bisect each other, the figure is a parallelogram.
3. Find the locus of a point P which moves so that its perpendicular distances from two given straight lines AB, CD are equal to one another.  
Construct a triangle, having given the base, the altitude, and the length of the median which bisects the base.
4. The medians of a triangle are concurrent.

The three medians cut one another at a point of trisection, the greater segment in each being towards the angular point.

5. The area of a triangle is half the area of the rectangle on the same base and having the same altitude.

ABC is a triangle, right-angled at C;  $a, b, c$  are the lengths of the sides opposite A, B, C, respectively; and  $p$  is the length of the perpendicular from C on AB. By expressing the area of the triangle in two ways, show that  $pc = ab$ . Hence deduce  $\frac{1}{p^2} = \frac{1}{a^2} + \frac{1}{b^2}$

6. The angles made by a tangent to a circle with a chord drawn from the point of contact are respectively equal to the angles in the alternate segments of the circle.

Two circles intersect at A and B; and through P, any point on one of them, straight lines PAC, PBD are drawn to cut the other at C and D. Show that CD is parallel to the tangent at P.

7. In a given circle inscribe a triangle equiangular to a given triangle.  
A square and an equilateral triangle are inscribed in the same circle. If  $a$  and  $b$  denote the lengths of their sides, show that  $3a^2 = 2b^2$ .

8. To draw an isosceles triangle having each of its angles at the base double of the vertical angle.

If, in the triangle ABC, the angle B equals the angle C and equals twice the angle A, show that  $\frac{BC}{AB} = \frac{\sqrt{5}-1}{2}$

9. If two triangles have one angle of the one equal to one angle of the other, and the sides about the equal angles proportional, the triangles are similar.

If A, B, C are three collinear points, and from B and C two parallel lines BP, CQ are drawn in the same sense, so that  $PB : QC :: AB : AC$ , show that the points A, P, Q are collinear.

10. In a right-angle triangle, any rectilinear figure described on the hypotenuse is equal to the sum of the two similar and similarly described figures on the sides containing the right angle.

If the sides containing the right angle are in the ratio 8 : 5, and the figure on the hypotenuse equals 8.9 sq. cm., find the areas of the figures on the sides.

"When the framers of our immortal constitution were in session, Benjamin Franklin complained to his colleagues of the small progress they had made after several weeks of deliberation. He used these memorable words: 'We have spent many days in fruitless discussion. We have been groping in the dark, because we have not sought light from the Father of Light to illumine our understanding. I have lived,' he continued, 'for many years, and the longer I live the more convincing proofs I have that God governs the affairs of men. And if a sparrow cannot fall to the ground without His notice, is it probable that an empire can rise without His aid and co-operation?'"

Bourget, même dans ses romans, c'est l'esprit philosophique, qui connaît tout ce qui est du monde des lettres, qui n'est étranger à rien et qui fait l'harmonie de cette vaste encyclopédie de son savoir par la puissance de son intelligence.

Bien qu'il n'ait pas d'aptitude pour "le grand sport de la politique" toute la politique et ses problèmes sont classés dans l'esprit de ce grand constructeur, dont la puissance de pensée est très rare, parce qu'elle est très complète.

Les dernières oeuvres de Bourget sont moralement supérieures aux premières, parce que la psychologie sociale y a pris la place de la psychologie passionnelle, que préfèrent encore certains lecteurs mondains.

Il est certain que la part la plus importante et la plus haute de son oeuvre est dans cette série d'oeuvres récentes sur les conditions de la santé sociale où l'on trouve les oeuvres de romans et de théâtre qui ont nom *l'Etape*, *le Divorce*, *l'Emigré*, *la Barricade*, *le Tribun*, en attendant une oeuvre prochaine qui résumera ses idées sur ces problèmes.

- I walk  $x$  miles  $540y$  yards from home. I then return homeward  $y$  miles  $1,080x$  yards. I then sit on a gate. How many yards is the gate from home?
- Prove that  $-(a-b)(b-c)(c-a) = bc(b-c) + ca(c-a) + ab(a-b)$ . Verify this when  $a = 10$ ,  $b = -9$ ,  $c = 11$ .
- Divide  $x^4 - 6x^3 + 8x^2 + 5x - 10$  by  $x^2 - x - 2$ .
- Put into factors and check your results by multiplication:  
(a)  $x^2 + 25x + 24$ . (b)  $15x^2 - 26x + 8$ . (c)  $a^2 - 4b^2$ . (d)  $x^7y^7 - 4x^3y^7$ .
- Find the value of:

$$(a) \frac{1}{x+1} - \frac{1}{(x+1)(x+2)}$$

$$(b) \frac{1}{x+1} - \frac{1}{(x+1)(x+2)} + \frac{1}{(x+1)(x+2)(x+3)}$$

Check your results in both cases by putting  $x = 1$ .

- Solve (a)  $\frac{x-8}{7} + \frac{x-3}{2} = 3\frac{1}{2}$ .  
(b)  $2x + 7y = 18$ ,  
 $3x + 4y = 14$ .

- One side of a rectangular field is  $x$  yards long, the other is 100 yards long. If the former side is increased to  $x+5$  yards, the latter remaining at 100 yards, the area is increased by 10 per cent. What is  $x$ ? What are the two areas?
- The road from a place A to a place B consists of 15 miles uphill, 40 miles level, 10 miles downhill. My motor does the journey in 3 hours 24 minutes. I notice my speed on the level is 20 miles per hour, while down hill it is 25 miles per hour. What was the speed uphill?

Using these speeds, estimate the time to return to A.

- I sell a horse for \$A and so gain  $x$  per cent. What was the cost price?

From this result write down the cost price, if, instead of gaining  $x\%$ , I lose  $\frac{x}{2}\%$ .

Use these results to help yourself to solve the following: I sell a horse for \$180 and so gain twice as much per cent as I should have lost if I had sold it for \$135. What was the cost price?

5. Prove that parallelograms on the same base and between the same parallels are equal in area.  
How would you measure the area of a triangle drawn on your paper?  
A sail in the form of a quadrilateral is laid out flat on the floor. You want to find its area. What measurements would you take? What formula would you use?
6. The track of a steamboat is a five-sided polygon ABCDE. Each of its interior angles is less than  $180^\circ$ . When the boat is for the second time on the track AB, through what angle has she turned?  
Can you deduce (or prove in any manner) a fact about the sum of the external angles of a polygon such as this? Does the number of sides matter?
7. Prove that, in a right-angled triangle, the square described on the hypotenuse is equal to the sum of the squares described on the other two sides.  
In the particular case of an isosceles right-angled triangle, draw the squares and divide them up so as to verify the proposition.
8. A point P is taken within a rectangle ABCD. Prove that  $PA^2 + PC^2 = PB^2 + PD^2$ . [*Hint for solution:* Draw the parallels through P to the sides.]
9. Give a geometrical illustration of the following algebraical identity:—  
 $(a+b)^2 = a^2 + b^2 + 2ab$ .

We owe a great debt to books. They are more obliging and kind than men. They instruct us without rods, without hard words and anger. If you approach them, they are not asleep; if you question them, they conceal nothing; if you mistake them, they never grumble; if you are ignorant, they do not laugh at you. Books are real friends. An ancient author writes: "The society of books is extremely agreeable, and never troublesome; I admit them to my company, and dismiss them from it whenever I please. Some of them relate to me the events of past ages, while others reveal the secrets of nature. Some by their vivacity drive away my cares; while others give fortitude to my mind, and teach me the important lesson how to restrain my desires and to depend wholly on myself. They open to me, in short, the various avenues of all the arts and sciences."

SESSIONAL PAPER No. 31

*The following is to be twice read aloud to the candidates, who will then write the gist of it in their own words.*

## WARREN HASTINGS.

Warren was early sent to the village school, where he learned his letters on the same bench with the sons of the peasantry: nor did anything in his garb or fare indicate that his life was to take a widely different course from theirs. But the daily sight of the lands which his ancestors had possessed, and which had passed into the hands of strangers filled his young brain with chimerical projects. He loved to hear stories of the wealth and greatness of his progenitors, of their loyalty, and their valour. On one bright summer day, the boy lay on the bank of the rivulet which flows through the old domain of his house to join the Isis. There rose in his mind a scheme which was never abandoned. He would recover the estate which had belonged to his fathers. He would be Hastings of Daylesford. This purpose, formed in infancy and poverty, grew stronger as his intellect expanded and as his fortune rose. He pursued his plan with that calm but indomitable force of will which was the most striking trait of his character. And when his long public life had at length closed for ever, it was to Daylesford that he retired to die.

Ce matin, des chants d'allégresse ont salué le vent du nord; ce soir, des cris de détresse retentissent de toutes parts. Je bondis sur ma terrasse, armé de mes jumelles, et je sonde toutes les parties de l'horizon; j'interroge les profondeurs du firmament. C'est le fléau des sauterelles.

Un nuage gris, semé de points brillants comme des myriades de petites étoiles, cache à ma vue l'azur du ciel. Ce nuage vient du sud, et il s'avance lentement vers le nord. Et les cris de détresse, partant des terrasses, des rues, des jardins, s'unissent en une clameur qui n'a plus rien d'humain. Des foules d'hommes, de femmes, d'enfants, sortant de la ville, se précipitent dans l'oasis, armés de marmites, de vieilles casseroles, de morceaux de cuir sec. Bientôt, de tous côtés, c'est un vacarme indescriptible, un infernal charivari; aux cris

de la multitude se mêle le fracas de tous les instruments improvisés, sur lesquels on frappe à tour de bras.

Ce nuage gris qui s'avance, c'est l'un des fléaux les plus redoutés des oasis du Sahara, qui, renfermées dans d'étroites limites et entourées d'immenses déserts, n'ont pas à leur portée de nombreuses ressources contre la famine.

*Traduire en anglais:*

Quelles que soient les diversités résultant du sol, de la race et des moeurs, une activité matérielle et intelligente ne cesse pas de sourdre sous les aspects régionaux de la vie commune. Un peuple n'a pas été impunément associé, depuis des siècles, à un travail continu. On dit que la vie est facile en Belgique, que nos provinces, malgré leurs vicissitudes politiques, ont un passé heureux et que c'est une grande erreur de parler, à notre propos, de dominations étrangères. J'en suis convaincu. Mais je crois aussi que le grand stimulant à notre vitalité, il faut le voir dans notre désir de vivre et par conséquent de travailler. Un principe foncier a été déposé par la Providence au coeur de nos deux races; secondé par le climat, par la terre, par l'histoire du monde, il a produit les fruits heureux de notre prospérité matérielle et morale; il s'épanouit, entouré de ces fruits, dans notre jeune conscience nationale.

Si nous caractérisons maintenant cette activité commune, si nous la confrontons avec l'histoire de notre pays nous connaissons les bases de notre association nationale. Celle-ci est bien antérieure à notre indépendance politique. Le royaume de Belgique est, sans doute, une création des puissances qui l'ont voulu neutre et qui ont déterminé, non sans arbitraire, la fiction de ses frontières. Mais la véritable raison de notre autonomie, la raison foncière, la raison imprescriptible désormais réside dans la valeur séculaire d'un effort commun; ainsi que l'atteste notre devise, l'union fait sa force.

Il faut remonter bien plus haut que la conférence de Londres, à l'origine de l'histoire moderne, au démembrement de l'empire de Charlemagne, au IX<sup>e</sup> siècle, pour trouver les sources de notre raison d'être. En effet, quand, comme l'écrivit notre grand historien, M. Henri Pirenne, à qui j'emprunte cette interprétation historique de nos origines, "quand, las de se combattre, les fils de l'Empereur se partagèrent en 843, à Verdun, l'héritage de leur père, Charles le Chauve reçut les régions qui devaient plus tard former la France, Louis le Germanique celles qui portèrent dans la suite le nom d'Allemagne. Quant à Lothaire, il obtint, entre les deux royaumes compacts assignés à ses frères, une immense bande de territoire, sans unité de race ni unité géographique, et qui s'étendait, coupant à rebours les chaînes de montagnes et les lignes de faite des bassins fluviaux, englobant des hommes de toute langue et de toute origine, de la mer du Nord au centre de l'Italie. C'est cet empire disparate, que représentent encore aujourd'hui sur la carte, fragments d'un tout en partie disparu, les petits Etats mitoyens parmi lesquels figure la Belgique."

L'origine lotharingienne de nos provinces a eu pour elles des conséquences politiques où il serait excessif de trouver les prémisses de leur situation internationale actuelle; elle a eu pour elles, en outre, des conséquences économiques et commerciales, dont il faut relever, dès ce moment, la signification, car leur commune activité en est sortie. "Le partage de Verdun," poursuit M. Pirenne,

*Traduire en français les deux extraits suivants :*

(a) In the vast area comprised by the prairie provinces, and in the ever-increasing acreage brought under cultivation in these provinces, it is hardly possible to expect the same conditions, and especially the same climatic conditions to prevail in all parts of the country. The day when there can be a total crop failure in western Canada may be said to have passed away; consequently, while it is possible to have shortages in crop of a character serious enough in itself in various parts of the country, yet the country, as a whole, may be fairly prosperous, and the crop a good average. This situation might fairly describe the conditions last year. While there was a good average crop, and while the climatic and other farming conditions were normal, at the same time there was a shortage of crop from lack of rainfall, and perhaps to some extent from lack of experience and proper methods of cultivation, in certain parts of southern Saskatchewan and southern Alberta. Even in these districts, however, where the farmer had spent some years in the country and had adapted himself to its peculiar conditions, fairly good crops resulted. In this part, however, during the last two years there has been a very considerable volume of new settlement, and the consequence was that the dry areas of these two sections last year found the new settler somewhat unprepared, and, as a result, it became necessary for the department to give special attention to the needs of the newcomers in southern Saskatchewan and southern Alberta. A seed grain distribution took place in these areas, to which reference will be made in a special report on the subject. Happily, no serious suffering took place. Most of these settlers were in this position: They had money enough to provide themselves with food and fuel during the winter, but this would make them short of cash to purchase seed grain in the spring. The department decided that, in the interests of the

settler himself, and in view of the increased area of cultivation this spring, it would be well for the government to look after the settler with reference to his seed grain for this year's crop, leaving him, in the ordinary course, to provide for himself and family out of his own resources. This was done very satisfactorily. Very few, comparatively, required both provisions and seed grain, and it is a matter of gratification to be able to say that in all this vast area of new settlement, with new settlers largely unaccustomed to our conditions, not a single fatality occurred, either from lack of food or fuel.

The department pursued a constant and vigilant inquiry amongst the new settlers with a view to discovering any and every case of suffering, and of affording immediate relief.

(b) With reference to the fishery question itself, I think it will be acknowledged by all members of this House that the tendency is, each year that passes, toward the greater depletion of the fisheries. That is the tendency in our lumber industry, it is the tendency in our coal and mineral industries, but it is more particularly the tendency with regard to our fisheries. Our population is continually increasing, fish foods are more eaten, the means of transportation are every day becoming better and cheaper, fresh fish is more easily obtained, and there is a greater consumption of it. As the price of fish rises, and it is constantly rising, old methods give place to new; the less destructive methods of catching fish are supplanted by more destructive methods, and the constant effort is to take as many as possible of the denizens of the waters from their natural habitat and transfer them to the tables of the people. All this is a constant menace to our fisheries. There is more than that. Don't let the people of the Maritime provinces think that the only fish in the world are to be found in the salt water. The fisheries in our inland waters are of immense benefit to our people. The source of supply from these inland fisheries is near to the people, and it is important that there should be a perennial, never-failing supply of fish from these inland waters. Both the inland and the salt water fisheries are of course important, but with the distribution of the increased population in our country, the inland fishery industry is perhaps more important still. If, in view of the increasing demand, you allow destructive methods of fishing, then the inland fisheries will be depleted in such a ratio that it does not require very long vision to see the practical disappearance of our food fish. To-day, the vast majority of fish that are taken from our inland waters are transported to the markets of another country and are eaten by people in Chicago, Detroit, or Boston, who do not care if it is the last fish in the stream, so long as they get it on their breakfast table. The Minister of Marine, the members of the government, the members of this House, have read the statistics, and they know that this is the truth. It is time there was a stop put to it. It may be ultra doctrine, but it is a doctrine that every good Canadian will subscribe to, that the food fishes of this country exist primarily for the consumption of the people of Canada, not even for the consumption of this generation of Canadians, but for the consumption of future generations. If we set our minds to it, it is possible for us to keep up a perennial supply of fish in these inland waters, as well as in our salt waters, so long as Canadians require fish food. I do not believe that any one will doubt that. But we have to be more heroic than we have been. The minister has got to be able to say to the supporter who comes to him, when both of them are absolutely certain that all the fish have been taken out in that season that ought to be taken out, that he will not permit any extension of the close season, or any departure from the regulations; that he will not yield to any request or any pressure, however strong. I know, as an administrator in that department and as an observant member of the body politic, that this is a tremendous force in this country, and we have got, somehow or other, to eliminate patronage from the fisheries of this country.

To Hon. LOUIS CODERRE,

SIR,—I have the honour to submit herewith the Annual Report of this Department for the fiscal year ending March 31, 1913. The details are, as usual, grouped under their proper heads, as Reports of the several branches under the Chief Accountant, Superintendent of Printing and Superintendent of Stationery, respectively. These statements are so complete that they furnish very full information respecting the work of the department during the year, so that lengthy comment is unnecessary. The volume of work, as was to have been expected, shows a steady increase, and the Printing Branch, by the addition of new plant, has been placed in a position to do more and better work at a smaller cost. The Stationery Branch has also been able to give a service that is considered very satisfactory.

	<hr/>

An increase of \$110,831.48, bringing the expenses of the Printing Branch over the million and a quarter dollar mark.

The amount of accounts for Intereolonial and Princee Edward Island Railways printing, which is audited at the Bureau, shows an increase of \$6,502.32:
